Allowable Subject Matter

1. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claim 1-20 are found to be in condition for allowance.

Reasons for Allowance

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claim is allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a system and method for preventing encoding time overrun comprising the steps of encoding a current frame using at least one catch-up mode encoding method to process the current frame in equal to or less than a frame period toward reducing encoding time overrun in response to the severity of the encoding time overrun.

It is noted that the closest prior art of record (Greenfield et al. US Patent no. 5760836) teaches a similar prevention method, however, Greenfield fails to particularly teach or suggest *"encoding a current frame using at least one catch-up mode encoding method to process the current frame in equal to or less than a frame period toward reducing encoding time overrun in response to a determined severity of the encoding time overrun."* as specified in the claim.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance".
